

EXPLORATORY DATA ANALYSIS (EDA) PROJECT

Introduction

The objective of this project is to analyze a sales dataset and identify patterns, trends, and business insights using Excel.

Dataset Overview

- Dataset Type: Sales Dataset
- Total Records: 1000
- Total Columns: 14

Columns Used

- Product ID
- Sale Date
- Sales Representative
- Region
- Sales Amount
- Quantity Sold
- Product Category
- Unit Cost
- Unit Price
- Customer Type
- Discount
- Payment Method
- Sales Channel

Analysis Performed

The dataset was analyzed using Pivot Tables and Charts in Microsoft Excel.

Region-wise Sales Analysis

Sales amounts were grouped by region to identify the best-performing regions.

Product Category Analysis

Product categories were analyzed to determine the distribution of products sold.

Key Findings

1. North region recorded the highest sales.

2. South region recorded the lowest sales.
3. Clothing category had the highest count (268).
4. Furniture category had a count of 260.
5. Electronics category had a count of 246.
6. Food category had a count of 226.

Visualizations
